ABOUT THE COMPANY

PROMAT COATING COMPANY LIMITED was established in 2014 as a dynamic and diversified company offering engineering service solutions to the Oil and Gas industry.

We have worked with local and international clients and achieved their appreciation for our reliable services in the fields of Insulation, Blasting & Painting, Passive Fireproofing works and Fabrication works.

We have achieved this position by;

- Investing in advanced technology
- Applying efficient safety methods
- Operating comprehensive training schemes
- Employing only the most experienced and qualified staff.
- By collaborating with our clients in the search for cost-effective and innovative solutions to the problems faced by the oil and gas industry.

We serve industries like Refineries, LNG Plants, Chemical Plants, Power Plants, Cement Plants, Fertilizer Plants, Gas Gathering Plants, Onshore & Offshore Modules, Marine Vessels, Jack up Rigs, z, CHW pipes, Pump rooms, HVAC ducts, Generator sound canopies, exhaust pipes etc.

We follow today's competitive market, customer relationship management as well as quality and service. We strive to focus on our clients needs to secure the integrity of customer and long-term partnership.

At Promat Coating Company Limited, we deliver on our commitments and manage risk by relying on ethical practices and proper oversight of business conduct.

Transparency and reporting are key elements of our governance. We measure and disclose both progress and areas of improvement via regular reporting of our performance, and we frequently conduct internal and third-party safety and environmental audits of our operations.

Our Industrial Insulation, Blasting & Painting, Passive Fireproofing and Fabrication solutions provide the different project stakeholders with a safe, comfortable and sustainable answer to their specific needs, whether insulating tanks, process pipelines, vessels, special equipment or high-temperature boilers.

Promat Coating Company Limited offers turnkey solution including Design, Detailed Engineering, Cad drawings, Procurement, Fabrication and Installation and Commissioning.

OUR VISION

To become a national leader in all our range of activities with a solid reputation built on quality services and trust-worthy performances, while retaining the ethical and moral fiber that has been the mainstay of all the company's dealings.

QUALITY ASSASURANCE

We set ourselves the highest standards throughout our business so that we consistently provide products and services that meet the needs of our customers.

We engage closely with our customers so that we fully understand the performance they require and can provide the appropriate solution.

TIMELY DELIVERY & RELIABILITY

We understand that receiving the correct products on time can be critical for our customers, so we hold ourselves to the highest standards when it comes to timely delivery and reliability.

We have worked hard to establish a comprehensive Quality Management System which has been certified as meeting the requirements of BS EN ISO 9001:2008, while refusing to compromise on quality and reliability.

HEALTH SAFETY ENVORONMENT

"Our goal is to create a working environment such that we cause no harm to people, and where we minimize our impact on the environment."

To achieve this, Promat Coating will;

- Always comply with international quality and safety standards.
- Operate our business to ensure proactive risk mitigation and continuous improvement;
- Set goals and targets, and measure performance against them;
- Hold ourselves and our contractors accountable to meet international standards; and
- Communicate openly with those who may be affected by our activities.

HEALTH, SAFETY

It is paramount that we protect the health and safety of our employees and contractors at work, and minimize all potential impacts to communities as a result of our work. Safe operations in all Promat Coating activities is a core value. If operational results and safety ever come into conflict, Promat Coating have a responsibility to choose safety over operational results and Promat Coating Company Limited will support that choice. Workplace health and safety and environmental protection are responsibilities shared by every member of the workforce.

SAFE AND RELIABLE OPERATIONS

Safe and reliable operations in all our activities is one of our company commitments. We implement processes that prevent incidents and injuries at work, and strive to continuously improve the process safety of our operations.

ENVIRONMENT

We are committed to environmental performance that meets or exceeds regulations in the areas where we operate. To do this, we seek to understand and then minimize our impact on air, land and water before and after commencing operations.

INDUSTRIES SERVED

Power plants
Fertilizer & cement plants
Petrochemical plants

Offshore and onshore Rigs
Marine vessels
Offshore platforms
Process Skids

Food processing plants
Beverages, Distilleries
Pharmaceuticals & Sugar plants
Commercial buildings,

OUR CORE BUSINESS

INSULATION
BLASTING & PAINTING
PASSIVE FIREPROOFING
FABRICATION WORKS

PIPING INSULATION

Promat Coating Company Limited is your source for commercial and industrial piping insulation products and accessories from today's leading manufacturers.

Piping Insulation is required for the purposes of conservation of heat, maintenance of stabilized process temperatures during atmospheric temperature changes, condensation prevention, burn prevention of personnel or limiting noise levels according to the classification nominated.

Depending on the specific application requirements Promat Coating Company Limited can perform any of the three types of piping insulation as required :

- **Cold insulation**
- **Hot Insulation and**
- **Personal Protection**

Promat Coating Company Limited insulating materials are :

- **Mineral wool.**
- **Glass wool.**
- **Flexible elastomeric foams.**
- **Rigid foam.**
- **Polyethylene.**
- **Cellular Glass.**
- **Aerogel and many others**

VESSEL INSULATION

Insulating tanks and vessels using polyurethane panels is another insulation service offered by Promat Coating Company Limited.

Tanks and Vessels can be insulated with polyurethane panels. The panels used also come in galvalume, galvanized, pre-painted and aluminum. The difference with these panels used, in comparison to the panels used for buildings is that there is only skin applied to one side of the panel. On the opposite side, the polyurethane is scored to give it the flexibility of forming around the tank. Stainless steel strapping is used to attach the panels to the tanks.

Another method would be to insulate with (Mineral Wool, Foamglas, Calcium Silicate, Urethane, and Fiberglass) and metal jacketing banded on with stainless steel strapping. When choosing the metal jacketing to be applied, certain textures such as smooth, corrugated or stucco embossed metal may be required. The most common insulations used are fiberglass and mineral wool.

Promat Coating Company Limited Insulating storage tanks and vessels helps improve all aspects of the oil and gas industry by effectively increasing:

- Cost savings
- Improves process control by preventing tanks from freezing or being heated by solar radiation.
- Increases safety levels for both interior and exterior factors.

BLASTING & PAINTING

Promat Coating Company Limited has distinguished itself over the years as a progressive company with the resources to handle any size project.

Blasting is the operation of forcibly propelling a stream of abrasive material against a surface under high pressure to smooth a rough surface, roughen a smooth surface, shape a surface, or remove surface contaminants.

Promat Coating Company Limited is equipped with the expertise and skilled personnel to undertake capital projects, or routine maintenance and accomplish desired goals.

Blasting & Painting prevents corrosion of concrete and steel. thereby preserving the item beneath them.

PASSIVE FIRE PROOFING

Promat Coating Company Limited is a professional Passive Fireproofing company, offering customers a one stop shop for all their fireproofing needs.

Passive fire protection is an integral component of the components of structural fire protection and fire safety

The purpose of the passive fire proofing is to insulate the structural steel in a fire situation and increases the time before the steel loses its design margin of safety.

We specialize in;

- **Cementitious fireproofing;**
- **Mineral fiber fireproofing; as well as**
- **Intumescent paint fireproofing**

Applications where fireproofing would be necessary would include;

- **Steel decking**
- **Structural beams, and**
- **Siding systems.**
